Jason Yap

Oviedo, FL | jason-yap@outlook.com | just-anotherday.github.io/yappotamus

Education

University of Central Florida, *Bachelor of Computer Science* 2023-2026

Expected Graduation: Spring 2026

Valencia College, *Associate of Arts* 2021-2023

Projects

Senior Design — AI-Assisted Operator Feedback Analysis (FPL) Fall 2025 – Spring 2026

- Built AI-assisted system to analyze operator outage feedback and validate records within Advanced Distribution Management Systems (ADMS)
- Developed workflows to process operator comments and identify patterns in outage reports
- Designed preprocessing and validation pipelines to improve accuracy of outage record analysis

SlimeScraper – Unity(C#) Summer 2025

- Built rogue-like FPS using procedural generation to dynamically create modular layouts and repeatable levels
- Implemented player movement system and enemy AI behavior using physics and C#
- Designed room architecture enabling flexible map generation and scalable gameplay

myUCF Class Scheduler | MERN Stack Spring 2024

- Built full-stack web application using MongoDB, Express, React, and Node
- Designed RESTful API endpoints to support CRUD operations
- Designed middleware and backend logic to manage user scheduling data

Experience

UNIVERSITY OF CENTRAL FLORIDA| IDESIGN Spring 2026

- Mentored senior design teams by reviewing technical architecture and providing development feedback
- Improved project completion consistency through structured technical review and problem-solving guidance

US ARMY | FORT BRAGG | CBRN SPECALIST 2017 - 2021

- Led hazardous materials detection and mitigation procedures during field operations
- Developed procedural workflow for hazard detection, mitigation and technical operation
- Awarded Army Achievement Medal for reliability and operational performance

T-MOBILE | NEW YORK CITY | SALES LEAD 2015-2017

- Troubleshot mobile devices and network issues while guiding customers through technical solutions
- Led sales floor operations and assisted team members in resolving complex customer cases

Skills

- Programming: Java, C, Python, C#, JavaScript
- Frameworks & Tools: Unity, Node.js, Express, React, MongoDB, Git
- Strengths: Problem Solving, Leadership, Team Collaboration, Adaptability
