Education

Bachelor of Science in Computer Science	2023-2026
<i>University of Central Florida, Orlando, Florida</i>	
<i>Valencia College, Orlando, Florida</i>	2021-2023

Projects

Senior Design AI-Assisted Operator Feedback Analysis Florida Power & Light	Spring 2026
- Built an AI-assisted analysis pipeline using Ollama model to extract structured insights from outage reports - Engineered prompt-based workflows for classification, validation, and detection across operator datasets - Automated preprocessing and inference workflows, reducing manual review effort and improving data consistency	
SlimeScraper Unity	Summer 2025
- Developed a procedural rogue-like FPS in Unity featuring modular room architecture and physics-based AI system - Implemented player movement and enemy AI behaviors using physics and state driven logic - Architected modular room structure enabling procedural map generation	
yourUCF Class Scheduler MERN Stack	Spring 2024
- Built a full-stack web application for course scheduling using MongoDB, Express, React, and Node - Developed RESTful API endpoints supporting CRUD operations for course schedule management - Designed backend scheduling logic and semester detection system to support real-time course planning	

Experience

University of Central Florida Orlando Florida Teaching Assistant	Spring 2026
- Mentored senior design teams by reviewing system architecture and providing technical guidance - Collaborated with faculty on research and development initiatives involving system design and project evaluation	
US Army Fort Bragg CBRN Specialist	2017 - 2021
- Led hazardous materials detection and mitigation operations in high-risk environments - Standardized workflows for detection and response procedures, improving operational consistency	
T-Mobile New York City Sales Lead	2015-2017
- Diagnosed and resolved mobile device and network issues for customers - Led sales floor operations and supported team members in complex technical cases	

Skills

- Languages: Python, Java, C, C#, JavaScript
- Frameworks/Tools: Unity, Node, Express, React, MongoDB, Git
