EDUCATION

Master of Science in Cybersecurity and Privacy

University of Central Florida - Orlando, FL

Expected Graduation: Spring 2028

2026–2028

Bachelor of Science in Computer Science

University of Central Florida - Orlando, FL

2023–2026

PROJECTS

Stock Intelligence Platform | *personal project*

Summer 2026

- Built analysis platform that aggregates financial news and generates company reports using OpenAI models.
- Implemented PostgreSQL data layer with reports metadata, news ingestion, and other background job processes.
- Deployed the frontend through Cloudflare and backend through Railway with configured live monitoring.

AI-Assisted Operator Feedback Analysis | *sponsored by Florida Power & Light*

Spring 2026

- Built an AI-assisted analysis pipeline using HuggingFace API to extract insights from utility outage reports.
- Engineered prompt-based workflows for classification, validation, and issue detection across operator datasets.
- Automated preprocessing workflows, reducing manual review effort and improving data consistency.

SlimeScraper | *Build with Unity*

Summer 2025

- Developed a procedural rogue-like FPS in Unity featuring modular room architecture and AI system.
- Implemented player movement and enemy AI behaviors using physics and state-driven logic.
- Architected modular room structure enabling procedural map generation.

yourUCF Class Scheduler | *full-stack web application*

Spring 2024

- Built a full-stack course-scheduling application using MongoDB, Express, React, and Node.js.
- Developed REST API endpoints supporting CRUD operations for course and schedule management.
- Designed scheduling logic and semester detection features to support interactive course planning.

EXPERIENCE

University of Central Florida | *Orlando, FL* | *Teaching Assistant*

Spring 2026

- Reviewed project documentation and technical deliverables to ensure completeness and clarity.
- Evaluated project metrics and deliverables to ensure alignment with requirements.

US Army | *Fort Bragg, NC* | *CBRN Specialist*

2017–2021

- Developed structured procedures for hazard detection and operational response workflows.
- Executed mission-critical detection and response operations in high-pressure environments.

T-Mobile | *New York, NY* | *Sales Lead*

2015–2017

- Diagnosed and resolved mobile device and network issues for customers.
- Led sales floor operations and supported team members in complex technical cases.

SKILLS & TECHNOLOGY

Languages: Python, TypeScript, JavaScript, Java, C, C#

Frameworks & Backend: React, Next.js, FastAPI, Node.js, Express, REST APIs, WebSockets

Data & AI: PostgreSQL, MongoDB, Supabase, OpenAI API, Ollama

Tools & Infrastructure: Docker, Git, GitHub, Railway, Cloudflare, Pytest
