EDUCATION

Master of Science in Cybersecurity and Privacy

University of Central Florida - Orlando, FL

Expected Graduation: Spring 2028

2026–Current

Bachelor of Science in Computer Science

University of Central Florida - Orlando, FL

2023–2026

PROJECTS

Stock Intelligence Platform | *market news webapp*

Summer 2026

- Built an analysis platform that aggregates financial news and generates company reports using OpenAI models.
- Configured a PostgreSQL data layer for report metadata, news ingestion, and background job processes.
- Hosted the frontend through Cloudflare and backend through Railway with configured live monitoring.

Advanced Distributed Management System AI-Assisted Operator Feedback Analysis

Spring 2026

- Developed an AI-assisted analysis pipeline using Hugging Face API to extract insights from utility outage reports.
- Used prompt-based workflows for classification, validation, and issue detection across operator datasets.
- Automated preprocessing workflows, reducing manual review effort and improving data consistency.

SlimeScraper | *Unity Game*

Summer 2025

- Created a procedural roguelike FPS in Unity featuring modular rooms and enemy AI.
- Programmed player movement and enemy AI behaviors using physics and state-driven logic.
- Designed a modular room system for procedural map generation.

yourUCF Class Scheduler | *full-stack web application*

Spring 2024

- Implemented a full-stack course-scheduling application using MongoDB, Express, React, and Node.js.
- Wrote REST API endpoints supporting CRUD operations for course and schedule management.
- Added scheduling logic and semester detection features to support interactive course planning.

EXPERIENCE

University of Central Florida | *Orlando, FL* | Teaching Assistant

Spring 2026

- Reviewed project documentation and technical deliverables for completeness and clarity.
- Evaluated project metrics and deliverables against stated requirements.
- Conducted regular check-ins with senior design teams to review progress, discuss challenges and track milestones.

US Army | *Fort Bragg, NC* | CBRN Specialist

2017–2021

- Prepared procedures for hazard detection and operational response workflows.
- Performed hazardous material detection, identification, and response in training and operational environments.
- Maintained readiness and calibration of specialized detection and response equipment.

T-Mobile | *New York, NY* | Sales Lead

2015–2017

- Diagnosed mobile devices, software, connectivity, and network issues for customers.
- Led sales floor operations and supported team members with complex technical cases.
- Managed escalated technical and customer service cases.

SKILLS & TECHNOLOGY

Languages: Python, TypeScript, JavaScript, Java, C, C#

Frameworks & Backend: React, Next.js, FastAPI, Node.js, Express, REST APIs, WebSockets

Data & AI: PostgreSQL, MongoDB, Supabase, OpenAI API, Ollama

Tools & Infrastructure: Docker, Git, GitHub, Railway, Cloudflare, Pytest
