

JASON YAP

Oviedo, FL | jason-yap@outlook.com | yapvibes.com | github.com/just-anotherday

EDUCATION

Bachelor of Science in Computer Science | *University of Central Florida, Orlando, Florida* **2023–2026**

PROJECTS

Stock Intelligence Platform | **Summer 2026**

- Built financial platform that collects market news and generates reports using OpenAI and local Ollama models.
- Engineered rule-based + AI hybrid logic to improve data consistency and reduce manual review workload.
- Collaborated with stakeholders to translate operational requirements into technical system specifications.

AI-Assisted Operator Feedback Analysis | *Florida Power & Light* **Spring 2026**

- Designed an AI-driven system to analyze and prioritize utility outage and operator reports in an ADMS environment.
- Engineered rule-based + AI hybrid logic to improve data consistency and reduce manual review workload.
- Collaborated with stakeholders to translate operational requirements into technical system specifications.

SlimeScraper | *Unity* **Summer 2025**

- Developed a procedural rogue-like FPS in Unity featuring modular room architecture and physics-based AI system.
- Implemented player movement and enemy AI behaviors using physics and state driven logic.
- Architected modular room structure enabling procedural map generation.

yourUCF Class Scheduler | *MERN Stack* **Spring 2024**

- Developed REST APIs for course management, scheduling logic, and real-time updates.
- Designed backend logic for conflict detection and semester-based scheduling.
- Implemented modular architecture for scalable feature expansion.

EXPERIENCE

University of Central Florida | *Orlando Florida* | *Teaching Assistant* **Spring 2026**

- Reviewed project documentation and technical deliverables to ensure completeness and clarity.
- Evaluated project metrics and deliverables to ensure alignment with requirements.

US Army | *Fort Bragg* | *CBRN Specialist* **2017–2021**

- Developed structured procedures for hazard detection and operational response workflows.
- Executed mission-critical detection and response operations in high-pressure environments.

T-Mobile | *New York City* | *Sales Lead* **2015–2017**

- Diagnosed and resolved mobile device and network issues for customers.
- Led sales floor operations and supported team members in complex technical cases.

SKILLS & TECHNOLOGY

- Languages: Python, TypeScript, JavaScript, Java, C, C#
- Technology: React, Next.js, Tailwind CSS, FastAPI, Node.js, Express, REST APIs, WebSockets, PostgreSQL, MongoDB, Supabase, Git, GitHub, Railway, Cloudflare, Docker, Ollama, OpenAI API, Pytest, API testing
